

# Shutter Card

A4 Cardstock - card base + insert

Shutters

Belly Band & panels

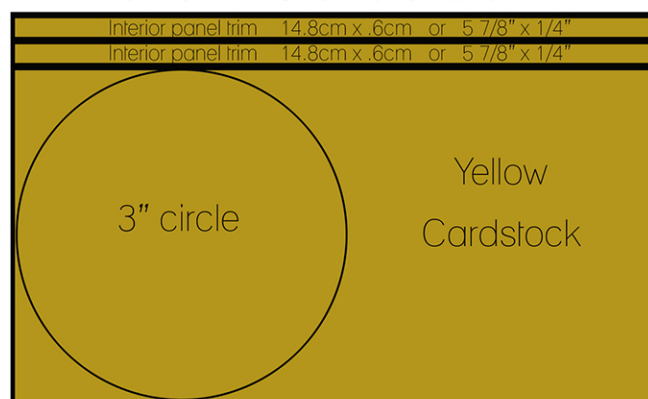

## TIPS

Create a shutter template from stiff cardstock so you only need to measure the cut out space once

Shutter pieces must be 1/4" down from top of card

Yellow Cardstock

## TIPS

Use the white circle cut-out to create a template showing the space available inside your shutter opening.

\* Once the shutter pieces are in place, place the circle underneath.

\* Use a pencil to trace inside the shutter opening shape.

\* Cut out the shape with a craft knife to create a window.

\* Use this to help figure out if the stamp you want to use will fit inside the shutter window.
